

Golden Rules

1 Buried services

No excavators within 500mm of known services.

4 Working plant

Must be isolated when people are in the red zone.

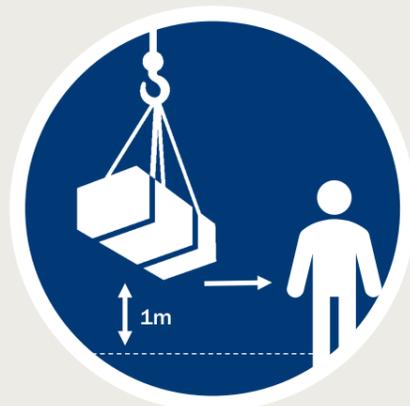

2 Plant and vehicles

Seatbelts must be worn.

5 Prevent falls

Stay on the safe side of the barrier.

3 Safe lifting

Keep a safe distance from any raised load over 1m.

6 Excavation collapse

Only enter if shored or profiled.

Remember, when working around high energy hazards, we must have a direct control or a minimum of two secondary controls.

Barriers

Keeping high energy and people apart - physically restricting access.

Monitoring

Someone's sole job to prevent people from entering a restricted area.

Reminders

An alarm or a physical reminder, like signage.

“If we cannot do it safely, we will not do it.”

Compliance with our Golden Rules is mandatory for all colleagues.

Non-compliance may result in disciplinary action or removal from site.

Care.

Our Health & Safety Strategy.
