

Green Rules

1 Waste management

Minimise waste and make sure the paperwork is correct.

4 Invasive species

Stop them from spreading.

2 Trees and wildlife

Avoid causing harm.

5 Licences and consents

Understand and comply.

3 Pollution

Prevent harm to land and rivers.

6 Temporary pumping

Plan for the flow and monitor.

Remember, high potential environmental impact must be prevented. Use direct controls or at least two secondary controls to prevent harm.

Barriers

Separate high impact hazards from the things they could harm.

Monitoring

Name the person responsible for implementing and checking the separations.

Reminders

Use physical signage to make sure high impact hazards are known.

Minimise. Reduce. Enhance.

Compliance with our Green Rules is mandatory for all colleagues.

We have a legal requirement and moral responsibility to prevent environmental harm when carrying out our activities.

Care.

Our Health & Safety Strategy.
